

Head Scratching:

If you are wondering what those buttons and menus mean, then there are a few options for learning,

- 1) **'You Tube'** your camera and model, there are excellent learning videos, just pick and choose which one is good for you.
- 2) **Join a Camera Club**, some are better than others, and most offer the first 3 visits free so you can see if you like them.
- 3) **Adult Learning Courses**, Stew went to Northampton Adult Learning classes in the evening, at that time they were about £115 for a 10 week course, nothing if you're on benefits.
- 4) **'On Line'** Educational Courses.
- 5) **Lastly**, read the manual that came with your equipment then revert to one of the other options above
